Claims 1-9, 27-59 are pending

Request for Continued Examination

The request filed on February 6, 2004 for a Continued Examination (RCE) under 37 CFR 1.114 based on parent Application No. 09/195,368 is acceptable and a RCE has been established. An action on the RCE follows.

Claims 1-9, and 27-59 are pending and are currently under consideration.

Specification

The specification is objected to under the brief description of Figures 2 and 7 for improper disclosure of amino acid sequences (i.e. TNF- α , APO2L, C995L, hGITR) without respective sequence identifiers, i.e. SEQ ID NOs:. Hence, it appears that the disclosure fails to comply with the requirements of 37 CFR 1.821 through 1.825. In the absence of a sequence identifier for each sequence, Applicant must provide a computer readable form (CRF) copy of the sequence listing, an initial or substitute paper copy of the sequence listing, as well as any amendment directing its entry into the specification, and a statement that the content of the paper and computer readable copies are the same and, where applicable, include no new matter, as required by 37 CFR 1.821(e-f) or 1.825(b) or 1.825(d). *Failure to supply the appropriate sequences identification numbers in response to this action will be considered non-responsive.*

Art Unit: 1642

Rejections Maintained:

Claims 1-9, and 27-58 remain rejected under 35 USC 102(e) as being anticipated by the disclosure of Yu *et al.* (US 5,988,171,) for the reasons of record. (See Actions mailed 04/07/2003 and 06/04/2002.) Applicants have not presented any new arguments in this filing of an RCE.

New Rejections:***Double Patenting***

A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

Claims 1-2, and 27-59 are provisionally rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 27-61 of copending Application No. 10/080455.

This is a provisional double patenting rejection since the conflicting claims have not in fact been patented.
